

aired on their 'Panorama' program. Fair enough, you may think:
*if the documentary tells the truth, as it's supposed to do - so
be it.*

But it doesn't. The BBC as usual, on matters involving politics,
set out to deliberately **distort the truth and lie, where
necessary**, in order to fulfil its objective of a hit piece; not a
true documentary - the working title of which was "**The
Tommy Robinson Takedown.**"

The BBC then denigrated everything that Tommy Robinson
stands for. And by doing so, as usual, looked down its elitist
nose at the working class - who support his campaign against
the industrial scale sexual exploitation of children in the U.K.

But Tommy had undercover reporters of his own, working
inside the BBC. And their dirty tricks, the corruption, the
doctoring of videos - in short the creation of the very 'fake
news' it uses in its constant virtue signalling, are about to be
exposed, in five countries, for all the world to see, on the 23rd
of February. It's all on video. They can't deny it.

Plans are being drawn up to air the exposé nationally, as of
now, on a giant TV screen outside the offices of the BBC -
either in London or Manchester, on Saturday the 23rd of
February. The BBC - who force you to pay them over one
hundred and fifty pounds a year, to have left wing propaganda
rammed down your throats, have shot themselves in both feet.

STOP believing Main Stream Media - THEY LIE!
